FOREWORD

No attempt has been made to make this catalogue exhaustive. It was found impracticable even to mention many prominent artists, especially the ancient masters, whose works are published by us, and in almost every instance we have had to restrict ourselves to one or two characteristic examples of the painter's works. Our purpose was merely to furnish dealers and private individuals with a representative illustrated list, trusting that those who do not find a desired work in these pages will not hesitate to communicate with us. Careful study has been given to the framing of our pictures in styles appropriate to the respective subjects and the rooms which they are intended to adorn. Estimates for such framing and suggestions for the suitable decoration of schools, colleges, religious institutions, nurseries, music rooms, libraries and halls, will be furnished on application. Personal inquiries and correspondence on this subject will receive our prompt attention.

Special lists of pictures which have been approved and recommended by the New York State Educational Department and Board of Education of the City of New York will be sent on request to all Teachers or Principals.

Approximate sizes of plates without margin are almost invariably given and it is only necessary to add that the standard sizes are:

EXTRA	24 x 32 inches.
NORMAL	20 x 25 inches.
IMPERIAL	14 x 19 inches to 16 x 20 inches.
ROYAL	11 x 14 inches.
FOLIO	7 x 9 inches to 8 x 10 inches.

The PHOTOGRAVURES are printed and mounted on Japan, India or Van Geldern paper, and the PHOTOGRAPHS on the best Bristol board.

OUR PROCESSES

It is not possible to quote the innumerable letters of the greatest artists who have expressed their entire satisfaction with our reproductions of their works. The specialty, of which we are most proud, is the PHOTOGRAVURE reproduction. All the leading art critics agree that the Photogravure process, as perfected by our establishment, is the most adequate and accurate, for reproducing a painting. It represents the final step in advance in the art of reproduction. The process consists of the direct transference of the Photographic image to a copper plate, which is then manipulated by some mordant, etching a perfect reproduction of the picture upon the plate. The Photogravure is printed like an engraving from the plate thus prepared. In this way our Photogravures combine the accuracy of Photography with the artistic qualities of a fine engraving. They are absolutely permanent.

In recognition of the superior quality of the few first impressions from the plate we issue our Photogravures not only in print state, but some of our choicest ones as ARTIST'S PROOFS, LIMITED IN NUMBER AND STAMPED, and issued in advance of the ordinary prints. How much they are appreciated by collectors is best indicated by the fact that almost all are entirely exhausted, and copies, if they can be had at all, command a high premium. The same is true of our MONOGRAPHS and GENERAL WORKS of art, a short list of which will be found at the end of this catalogue.

A few of our publications are reproduced in FACSIMILE. Some are examples of the three and four color process, while others are FACSIMILEGRAVURES printed from

Photogravure plates by an exquisite special color process in one impression, giving an exact copy of the colors of the original painting. This process resembles the one employed about one hundred years ago in producing those colored engravings which have now become so valuable.

Many of our subjects can also be had in CARBONPHOTOGRAPHS, which are copies from the original negative on green or brown Carbon paper. They combine permanency with excellence of finish.

Our Photographs are all made by the isochromatic process, i. e., copied from the negative plate on SENSITIZED ALBUMEN paper, and their quality is so generally known as to require no further comment.

Other kinds of reproductions made directly from the negative are our Baryto- and Sepia-prints. The Barytoprints have the appearance of Platinotypes, which they resemble in the greyish tone, but which they surpass by clearness of printing and artistic quality. The Sepiaprints are made in a process similar to the Barytoprints, but with a warm *reddish* tone.

Any of the reproductions listed in this catalog (except the Carbonphotographs) can be furnished COLORED by hand. Prices for such copies will be furnished on request.

We shall hereafter publish semi-annually an illustrated SUPPLEMENT to this catalog, containing cuts of every NEW subject published by the Berlin Photographic Company. This supplement will be uniform in size with the present catalog and will be furnished on special request.
